Intuitive Digital Workflows for Your Daily Challenges

The Intraoral
Scanner from GC
Aadva™ IOS 100 P
based on AI Technology

Aadva IOS 100 P - addressing your daily practice needs through its modular, intuitive, case-management solutions

IOS 100 Portable

Portable

IOS 100 P is a compact system - only a handpiece, cradle and laptop

Anti-fog heating

Scans are easily performed with the anti-fogging function in the cradle and the powder and spray-free technology

Light handpiece

IOS 100 P has impressively small and light handpiece

Easy File Transfer

USB, local network and Aadva Share

No Calibration Needed

Trouble-free and reliable results every time you scan

Open System

Open STL and PLY files offering full compatibility with third party software and hardware

Visual and Audio Feedback

Gain full control of your scanning procedure

General scanning features

- AI Technology filters the soft and moving tissues to allow a smooth scanning process
- Scan, pause, check and rescan anytime you want
- Automatic bite alignment
- Simple and intuitive user interface
- Simple order sheet with necessary information for labs
- Automated import of files to exocad

Ortho Module

- Customised workflow for your ortho case follow up
- Dedicated PDF file to assist treatment planning
- Possibility to record both central relation (CR) centric occlusion (CO) bites
- Integrated ortho model maker, hollowed out (American-cut) for optimal 3D printing
- Integrated third party communication possibilities (VDDS)
- Scan files compatible with various aligner systems
- Patented impression scan workflow
