Lecturer in Mediterranean Dental Forum, January 2003.

Lecturer in Andalusian Prosthetic College (Sevilla, Granada and Jaén)

Contributor for GC in aesthetic coatings with Gradia (laboratory) and Gradia Direct

Author of many scientific articles, national and international.

Restorations with **composite** **in ceramic** rehabilitation

By **F. Troyano**, Spain

For many years, many professionals, both technician and clinicians, found it stressful to deal with a case of a ceramic fracture which had been in mouth for a long period.

It is well known that when a fracture occurs in any ceramic rehabilitation in mouth, it is reckless to put the restoration back in the furnace. The most probable consequence is the crash of the ceramic, with the subsequent inconvenience of having to repair it, plus the cost.

Nowadays, these fractures can be repaired in an easy and quick way, without the high cost of doing the restoration all over again from the start.
