

Simplifying direct adhesive restorations with **GC Essentia** composite

A clinical case report by **Dr Gianfranco Politano**, Italy

Dr Gianfranco Politano,
DDM, MSC

*Gianfranco was born in 1971
in Crotona, Italy.*

*He finished dental school
at Modena University,
in the north of Italy.*

*Founder member of
Bio-Emulation group with
Dr. P. Bazos and Dr. J.T. Guadix.
Active member of S.I.D.O.C. :
Italian society of conservative
dentistry.*

*Active member of "warm
gutta-percha study club".
Gianfranco lives and works
in Rome, in "studio Calesini
- Roma".*

*He focuses on adhesive
restorative dentistry and
endodontics.*

*He is an international lecturer
and he published several
articles in restorative dentistry.*

A patient came to the office due to pain when eating sweet food after the recent placement (less than six months before) of two adhesive restorations (Figure 1). After clinical evaluation, it became evident that this pain was probably caused by marginal gaps on 36 and 37. It was thus decided to replace both restorations, and to use for this purpose GC's new composite, Essentia.
