

P.D. Dr. med. Dent. José Ignacio Zorzin obtained his Master degree in Dentistry in 2009 and his doctorate in 2011 at the Friedrich-Alexander-University of Erlangen-Nürnberg (Germany). In 2019, he successfully completed his habilitation at the same university. Since 2009, he is a research assistant and dentist at the Dental Clinic 1 (preventive dentistry and periodontology) of the University hospital of Erlangen. He actively participates in research and teaching and is a supervisor of several courses and dissertations. He received several awards for his research on bulk-fill composites. He is a member of many professional associations, such as the Deutsche Gesellschaft für Zahnerhaltung, the Academy of Dental Materials and the International Association for Dental Research (IADR) and a reviewer for several scientific journals, such as *Dental Materials*, *Journal of Adhesive Dentistry* and *Clinical Oral Investigations*.

Simple adhesive luting in everyday practice – ONE for all

By P.D. Dr. med. Dent. José Ignacio Zorzin,
Germany

Self-adhesive resin cements facilitate the adhesive bonding of indirect restorations. When using these materials, no pre-treatment of the hard tooth substances is necessary. Self-adhesive resin cements have a wide indication spectrum, but in everyday practice you have to resort to conventional adhesive cementation in some cases. As a result, you have to procure both a self-adhesive cement and a conventional composite cement and select your cement per case. Universal self-adhesive resin cements are an interesting solution to this problem. They can be used as self-adhesive resin cement and - in combination with an associated primer - also as a conventional adhesive resin cement.

The following clinical cases show the possibilities of using a universal self-adhesive resin cement (G-CEM ONE, GC Europe). The first case shows the self-adhesive cementation of a monolithic zirconium oxide bridge and the second case the conventional adhesive cementation of two lithium disilicate inlays (Initial LiSi Press, GC Europe).
