Tooth Mousse and MI Paste Plus from GC.

Topical creme with bio-available
calcium and phosphate
(with or without fluoride)

Part of GC's Minimum
Intervention program.

GC

TOOTH MOUSSE – CPP-ACP (Recaldent™) / MI Paste PLUS Topical cream with bio-available calcium and phosphate

1. Dental caries in the cotton rat. VI. The effect of the amount of protein, fat and carbohydrate in the diet on the incidence and extent of carious lesions. Schweigert BS, Shaw JH, Zeplin M, Elvehjem CA. *J.Nutr.* 31: 439-447 (1946)
2. Effects of dietary composition on tooth decay in the albino rat. Shaw JH. *J.Nutr.* 41: 23-23 (1950)
3. Protein factors and experimental rat caries. Bavetta LA, McClure FJ. *Nutr.* 63: 107-117 (1957)
4. Calcium phosphate sequestering phosphopeptide from casein. Reeves RE, Latour NG. *Science* 128: 472 (1958)
5. Effects of various sucrose-casein ratios in purified diets on the teeth and supporting structures of rats. Holloway PJ, Shaw JH, Sweeny EA. *Arch Oral Biol* 3: 185-200 (1961)
6. A review of the effect of milk on dental caries. Reynolds EC, Storey E. *Aust.J.Dairy Tech.* 34:175-179 (1979)
7. Effect of milk on caries incidence and bacterial composition of dental plaque in the rat. Reynolds EC, Johnson IH. *Arch Oral Biol* 1981 26:5 445-51
8. Phosphoprotein inhibition of hydroxyapatite dissolution. Reynolds EC, Riley PF, Storey E. *Calcif Tissue Int* 1982 34 Suppl 2: S52-6
9. Effect of adsorbed protein on hydroxyapatite zeta potential and *Streptococcus mutans* adherence. Reynolds EC, Wong A. *Infect Immun* 1983 Mar 39:3 1285-90
10. Effect of casein and whey-protein solutions on caries experience and feeding patterns of the rat. Reynolds EC, del Rio A. *Arch Oral Biol* 1984 29:11 927-33
11. Effect of cheese, with and without sucrose, on dental caries and recovery of *streptococcus mutans* in rats. Rosen S, Min DB, Herper DS, Herper WJ, Beck EX, Beck FM. *J Dent Res* 63: 894-896 (1984)
12. Cariostatic evaluation of cheeses with diverse physical and compositional characteristics. Harper DS, Osborn JC, Clayton R, Hefferren JJ. *Caries Res* 20:123-130 (1986)
13. Role of *streptococcus mutans* in human dental decay Loesche WJ *Microbiol. Rev.* 1986 Dec;50(4): 353-380
14. Modification of food cariogenicity in rats by mineral-rich concentrates from milk. Harper DS, Osborn JC, Clayton R, Hefferren JJ. *J Dent Res* 66:42-45 (1987)
15. Effects of water soluble components of cheese on experimental caries in humans. Silva MfdeA, Burgess RC, Sandham HJ, Jenkins GN. *J Dent Res* 66: 38-41 (1987)
16. The prevention of sub-surface demineralization of bovine enamel and change in plaque composition by casein in an intra-oral model. Reynolds EC. *J Dent Res* 1987 Jun 66:6 1120-7
17. Reduction of chocolate's cariogenicity by supplementation with sodium caseinate. Reynolds EC, Black CL. *Caries Res* 1987 21:5 445-51
18. Confectionery composition and rat caries. Reynolds EC, Black CL. *Caries Res* 1987 21:6 538-45

19. The effects of cheese snacks on caries in desalivated rats. Krobicka A, Bowen WH, Pearson S, Youn DA. *J Dent Res* 66: 1116-1119 (1987)
20. Protein dissimilation by human salivary-sediment bacteria. Reynolds EC, Riley PF. *J Dent Res* 68: 124-129 (1989)
21. Cariogenicity of a confection supplemented with sodium caseinate at a palatable level. Reynolds EC, Black CL. *Caries Res* 23:368-370 (1989)
22. A 24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing xylitol in school preventive programs. Kandelman D, Gagnon G. *J Dent Res* 69(11): 1771-1775 (1990)
23. Efficient solution-phase synthesis of multiple O-phosphoserine-containing peptides related to casein and statherin. Perich JW, Kelly DP, Reynolds EC. *Int J Pept Protein Res* 1992 Aug 40:2 81-8
24. The use of synthetic phosphopeptides for epitope mapping of the α s1- casein phosphopeptide segment 59 -79. Perich JW, Reynolds EC. *Bioorg Med Chem Lett* 1992 2:1153 - 1154
25. An in situ model for simultaneous assessment of inhibition of demineralization and enhancement of remineralization. Featherstone JDB, Zero DT. *J Dent Res* 71(Spec. Iss.): 804-810 (1992)
26. The analysis of multiple phosphoserine-containing casein peptides using capillary zone electrophoresis. Adamson N, Riley PF, Reynolds EC. *J Chromatogr* 1993 Sep 3 646:2 391-6
27. A selective precipitation purification procedure for multiple phosphoserine-containing peptides and methods for their identification. Reynolds EC, Riley PF, Adamson NJ. *Anal Biochem* 1994 Mar 217:2 277-84
28. High performance capillary electrophoresis of casein phosphopeptides containing 2-5 phosphoserine residues: relationship between absolute electrophoretic mobility and peptide charge and size. Adamson NJ, Reynolds EC. *Electrophoresis* 16: 525-528 (1995)
29. A 1H-NMR study of the casein phosphopeptide α s1-casein(59-79). Huq NL, Cross KJ, Reynolds EC. *Biochim Biophys Acta* 1995 Mar 15 1247:2 201-8
30. Anticariogenicity of calcium phosphate complexes of tryptic casein phosphopeptides in the rat. Reynolds EC, Cain CJ, Webber FL, Black CL, Riley PF, Johnson IH, Perich JW. *J Dent Res* 1995 Jun 74:6 1272-9
31. In situ caries models. Zero DT. *Adv Dent Res* 9(3): 214-230 (1995)
32. Characterisation of tryptic casein phosphopeptides prepared under industrially-relevant conditions. Adamson NJ, Reynolds EC. *Biotec Bioeng* 1995 45:196-204
33. Role of models in assessing new agents for caries prevention--non-fluoride systems. Roberts AJ. *Adv Dent Res* 1995 Nov;9(3):304-11; discussion 312-4
34. Incorporation of caseinoglycomacropeptide and caseinophosphopeptide into the salivary pellicle inhibits adherence of mutans streptococci. Schupbach P, Neeser JR, Golliard M, Rouvet M and Guggenheim B. *J Dent Res*, Vol 75, 1779-1788 (1996)
35. Ability of a b-casein phosphopeptide to modulate the precipitation of calcium phosphate by forming amorphous dicalcium phosphate nanoclusters Holt C, Wahlgren NM and Drakenberg T. *Biochem J* (1996) 314 (1035-1039)
36. Dairy products and dental health. Reynolds EC. *Proc Nutr Soc Aus* 1997 76:1587-1595
37. Remineralization of enamel subsurface lesions by casein phosphopeptide-stabilized calcium phosphate solutions. Reynolds EC. *J Dent Res* 1997 Sep 76:9 1587-95

38. Anticariogenic complexes of amorphous calcium phosphate stabilized by casein phosphopeptides: a review. Reynolds EC. Spec Care Dentist 1998 Jan-Feb 18:1 8-16
39. Anticariogenic casein phosphopeptides. Reynolds EC. Prot Peptide Lett 1999 295-303
40. Advances in enamel remineralization: anticariogenic casein phosphopeptide-amorphous calcium phosphate. Reynolds EC, Black CL, Cross KJ, Eakins D, Huq NL, Morgan MV, Nowicki A, Perich JW, Riley PF, Shen P, Talbo G, Webber FW J Clin Dent 1999 X(2):86-88
41. Calcium phosphates in demineralization/remineralization processes. Legeros RZ J Clinical Dent X:65-73 (1999)
42. The role of phosphopeptides in caries prevention. Reynolds EC. Dental Perspectives 1999 3:6-7
43. Molecular modelling of a multiphosphorylated sequence motif bound to hydroxyapatite surfaces. Huq NL, Cross KJ, Reynolds EC. J Mol Mode 2000 6:35-47
44. The use of casein phosphopeptides in oral care products for the prevention and treatment of early enamel caries. Reynolds EC. Aust J Dairy Technol 2000 55:1-6
45. Binding characteristics of streptococcus mutans for calcium and casein phosphopeptide. Rose RK. Caries Res 2000 34 427-431
46. Remineralisation of fluorotic enamel lesions by casein phosphopeptide - amorphous calcium fluorophosphate (CPP-ACFP) solution. Roberts MJ, Messer LB, Reynolds EC. IADR,ANZ division, Abstract 54,2000
47. Experimental study of phosphopeptide in promoting tooth remineralization Zhang L, Li Z, Dong Y. Chin J Dent Res. 2000 May;3(1):27-30
48. Effects of an anticariogenic casein phosphopeptide on calcium diffusion in streptococcal model dental plaques. Rose RK. Arch Oral Biol, Volume 45, Issue 7, 2000, Pages 569-575
49. Enamel remineralization by chewing gum containing casein phosphopeptide - amorphous calcium phosphate. Reynolds EC, Shen P, Cai F, Nowicki A, Vincent J. IADR,General session,Chiba,Abstract 0489,2001
50. Structural studies of the β - casein phosphopeptide bound to amorphous calcium phosphate. Cross KJ, Huq NL, Eakins D, Reynolds EC. IADR,General session,Chiba,Abstract 0490,2001
51. Ultrastructural studies of the casein phosphopeptide- amorphous calcium phosphate nanoclusters. Cross KJ, Huq NL, Eakins D, Reynolds EC. IADR,General session,Chiba,Abstract 0491,2001
52. Cation-dependent structural features of beta-casein-(1-25). Cross KJ, Huq NL, Bicknell W, Reynolds EC. Biochem J 2001 May 15 356:Pt 1 277-86
53. MALDI-PSD-MS analysis of the phosphorylation sites of caseinomacropeptide. Talbo GH, Suckau D, Malkoski M, Reynolds EC. Peptides 2001 Jul 22:7 1093-8
54. Health aspects of dairy products- Dairy products in relation to caries prevention and oral health.Invited review. Reynolds EC. Encycl Dairy Sciences 2001
55. Remineralization of enamel subsurface lesions by sugar-free chewing gum containing casein phosphopeptide-amorphous calcium phosphate. Shen P, Cai F, Nowicki A, Vincent J, Reynolds EC. J Dent Res 2001 Dec 80:12 2066-70
56. Remineralization of early enamel caries by anticariogenic casein phosphopeptide-amorphous calcium phosphate nanocomplexes. Reynolds EC. Dental Practice 2001 November / December

57. An in vitro investigation of the effects of casein phosphopeptide-stabilized amorphous calcium phosphate (CPP-ACP) on erosion of human dental enamel by a sports drink. Ramalingam L, Messer LB, Reynolds EC. IADR, General session, San Diego 2002 - Abstract 2810
58. A clinical trial of the anticaries efficacy of casein derivatives complexed with calcium phosphate in patients with salivary gland dysfunction. Hay KD and Thomson WM. Oral Surg Oral Med Oral Pathol Oral Radiol Endod 2002;93:271-5
59. Incorporation of Casein Phosphopeptide-Amorphous Calcium Phosphate into a Glass-ionomer Cement. Mazzaoui SA, Burrow MF, Tyas MJ, Dashper SG, Eakins D, Reynolds EC. J Dent Res 2003 Nov 82:11 914-8
60. Caries prevention potential of a tooth-coating material containing casein phosphopeptide - amorphous calcium phosphate (CPP - ACP). Sato T, Yamanaka K, Yoshii E. IADR, General session, Goteborg 2003, Abstract 1007
61. Retention in plaque and remineralization of enamel lesions by various forms of calcium in a mouthrinse or sugar-free chewing gum. Reynolds EC, Cai F, Shen P, Walker GD. J Dent Res 2003 Mar 82:3 206-11
62. Remineralization of enamel subsurface lesions in situ by sugar-free lozenges containing casein phosphopeptide-amorphous calcium phosphate. Cai F, Shen P, Morgan MV, Reynolds EC. Aus Dent J 2003 48:4 240-243
63. Erosion of human dental enamel by sports drinks. Ramalingam L, Messer LB, Reynolds EC. Synopses 27:16-19 (2003)
64. Dairy components in oral health. Reynolds EC. Aust J Dairy Tech 58:79-81 (2003)
65. Molecular modelling of the multiphosphorylated casein phosphopeptide alpha s1-casein (59-79). Huq NL, Cross KJ, Reynolds EC. J Dairy Res 71:1-5 (2004)
66. Acid resistance of enamel subsurface lesions remineralized by a sugar-free chewing gum containing casein phosphopeptide-amorphous calcium phosphate (CPP-ACP). Iijima Y, Cai F, Shen P, Walker G, Reynolds C, Reynolds EC. Caries Res 2004;38:551-556
67. NMR studies of a novel calcium, phosphate and fluoride delivery vehicle - the multiphosphorylated peptide alpha s1-casein (59-79) complexed with amorphous calcium fluoride phosphate. Cross KJ, Huq NL, Sum M, Stanton D, Reynolds EC. Biomaterials 25:5061-5069
68. Fluoride effect on acid resistance capacity of CPP-ACP containing material. Kariya S, Sato T, Sakaguchi Y, Yoshii E. Abstract 2045 - 82nd General Session of the IADR, 2004, Honolulu, Hawaii.
69. Remineralization power by xylitol chewing gums. Murata Y, Matsuda Y, Tanaka T, Ikeda T, Komatsu H, Sano H, Miyake R, Morita M. Abstract 2046 - 82nd General Session of the IADR, 2004, Honolulu, Hawaii
70. Effects of cheese and milk containing CPP-ACP on enamel remineralization. Minami K, Inaba D, Yonemitsu M, Koganei M, Oda M. Abstract 2049 - 82nd General Session of the IADR, 2004, Honolulu, Hawaii
71. Molecular of anticariogenic casein phosphopeptide aS2-CN(2-20) NMR spectroscopy derived constraints. Deangelis EF, Huq NL, Cross KJ, Reynolds EC. Abstract 2997 - 82nd General Session of the IADR, 2004, Honolulu, Hawaii
72. Determination of demineralization of tooth substrate by use of an ultrasonic device. Takamizawa T, Yamaguchi K, Inage H, Miyazaki M, Ando S, Hinoura K. Japan J Conserv Dent 2004 Jun 47 Spring Issue 24 - Abstract B-4
73. Clinical effectiveness of a CPP-ACP crème for tooth hypersensitivity treatment. A. Poitevin, M. Peumans, J. De Munck, K. Van Landuyt, E. Coutinho, M. Braem, B. Van Meerbeek. EADR Istanbul, 25-28 August 2004 - Abstract 0136

74. Enamel remineralization by a mouthrinse containing casein phosphopeptide-amorphous calcium phosphate and fluoride in an in situ model. P. Shen, F. Cai, G. Walker, C. Reynolds, E.C. Reynolds. Australian Dental Journal ADRF Special Research Supplement 2004; 49:4
75. Investigation of the binding of casein phosphopeptides to the major enamel pellicle proteins. M. Ung, N.L. Huq, K.J. Cross, E.C. Reynolds. Australian Dental Journal ADRF Special Research Supplement 2004; 49:4
76. Additional aids to the remineralisation of tooth structure. E.C. Reynolds, L.J. Walsh. Textbook: Preservation and Restoration of Teeth - 2nd edition 2005, p111-118. *
77. Acid Resistance of Enamel Subsurface Lesions Remineralized by a Sugar-Free Chewing Gum Containing Casein Phosphopeptide-Amorphous Calcium Phosphate. Y. Iijima, F. Cai, P. Shen, G. Walker, C. Reynolds, E.C. Reynolds. Caries Res 2004;38:551-556.
78. La reminéralisation des lésions carieuses (2) synergies thérapeutiques. J.-J. Lasfargues, J.M. Ten Cate, C. Miller. Realités Cliniques Vol. 15 n° 3, 2004 pp. 261-275
79. Using ultrasound transmission velocity to analyze demineralization of tooth substrate. M. Miyazaki, K. Yamaguchi, T. Takamizawa, H. Inage, K. Hinoura. Abstract 94 – 52nd ORCA Congress, July 2005, Indianapolis, USA / Caries Res 2005; 39:319
80. Fluoride uptake and distribution in enamel and dentin after application of different fluoride solutions. B.E. Holler, K.-H. Friedl, H. Jung, K.-A. Hiller, G. Schmalz. Clin Oral Invest (2002) 6:137-144
81. Preventing acid induced enamel demineralization using CPP-ACP containing paste. Y.Sakaguchi, S. Kato, T. Sato, S. Kariya and L. Chen. Abstract 2055 - IADR, March 2005, Baltimore, Maryland, USA
82. Casein Phosphopeptide-Amorphous calcium phosphate paste: root surface caries formation. J.Hicks and C. Flaitz. Abstract 3275 – IADR, March 2005, Baltimore, Maryland, USA.
83. Nuove strategie nella prevenzione della carie dentaria:studio sperimentale sui caseino-fosfoeptidi. G.F Ferrazzano, S. Troianiello, G. Sangianantoni, A. Ingenito. Prevenzione Odontostomatologica 2005 ; 4 :15-21 *
84. Minimal intervention dentistry: part 1. Strategies for addressing the new caries challenge in older patients. J.M. Chalmers. JCDA, June 2006, Vol.72, No.5 *
85. Promoting remineralization: using casein phosphopeptide – stabilized amorphous calcium (fluoride) phosphate. A chemical approach. D.J. Manton. EAPD, Amsterdam 8-11 June, 2006
86. Acid resistance of remineralized enamel by a sugar-free chewing gum. Y. Iijima, M. Nishimura, S. Iijima. Abstract 184 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
87. Remineralization of white spot lesions in situ by tooth mousse. D.J. Manton. P. Shen, F. Cai, N.J. Cochrane, C. Reynolds, L.B. Messer, E.C. Reynolds. Abstract 185 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
88. Remineralization by a mouthrinse containing CPP-ACP at pH 5.5. P. Shen, F. Cai, G.D. Walker, C. Reynolds, E.C. Reynolds. Abstract 189 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
89. Remineralization by chewing gum containing CPP-ACP and citric acid. F. Cai, P. Shen, G.D. Walker, Y. Yuan, D.J. Manton, C. Reynolds, E.C. Reynolds. Abstract 190 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.

90. Remineralization potential of CPP-ACP and its synergy with fluoride. Y. Sakaguchi, S. Kato, T. Sato, S. Kariya, S. Nagao, L. Chen. Abstract 191 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
91. QLF and TMR analysis of CPP-ACFP remineralized enamel in vitro. N.J. Cochrane, F. Cai, E.C. Reynolds. Abstract 192 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
92. Effect of CPP-ACP versus potassium nitrate on cervical dentinal hypersensitivity. L.J. Walsh, W.S. Wang, A. Cakar, C. Devani, K.K. Tran, A. Hall. Abstract 947 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
93. Plaque microcosm biofilm mineralization by CPP-ACP and calcium-phosphate-monofluorophosphate-urea mineralizing solution. L. Wong, C.H. Sissons. Abstract 1269 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
94. Effect of CPP-ACP on hardness of enamel eroded by Cola-drink. H. Sukasaem, M. Panich, S. Poolthong. Abstract 1673 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
95. An in vitro study of wear prevention in dentine. T. Narayana, S. Ranjitkar, J.A. Kaidonis, G.C. Townsend, L.C. Richards. Abstract 2424 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
96. Enamel wear prevention under conditions simulating bruxism and acid regurgitation. S. Ranjitkar, J.A. Kaidonis, G.C. Townsend, L.C. Richards. Abstract 2428 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
97. CPP-ACP gum slows progression and enhances regression of dental caries. M.V. Morgan, G.G. Adams, D.L. Bailey, C.E. Tsao, E.C. Reynolds. Abstract 2445 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
98. Structure and 15N-Dynamics of casein phosphopeptide-amorphous calcium phosphate nanocomplexes. K.J. Cross, T.J. Attard, N.L. Huq, E.C. Reynolds. Abstract 2534 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
99. Improved plaque uptake and enamel remineralization by fluoride with CPP-ACP. E.C. Reynolds, N.J. Cochrane, P. Shen, F. Cai, G.D. Walker, M.V. Morgan, C. Reynolds. Abstract 2538 – 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
100. Prevention of white spot lesions in orthodontic practice: a contemporary review. T.R. Sudjalim, M.G. Woods, D.J. Manton. Australian Dental Journal 2006;51(4):284-289
101. In situ remineralisation by sugar-free gums, one containing CPP-ACP. D.J. Manton, F. Cai, N. Cochrane, G.D. Walker, P. Shen, G. Adams, L.B. Messer, C. Reynolds, E.C. Reynolds. Abstract 0020 – 45th Annual Meeting of Australian/New Zealand Division of the IADR, 25-28 September 2005
102. Incorporation of casein phosphopeptide-amorphous calcium phosphate into a temporary cement. R. Wong, J. Palamara, P.R. Wilson. Abstract 0653 - 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.
103. Incorporation of casein-phosphopeptide-amorphous calcium phosphate into glass ionomer cement. H. Al-Zraikat, J. Palamara, M. Burrow, H. Messer. Abstract 0654 - 84th General Session of the IADR, 28 June - 1 July 2006, Brisbane, Australia.

104. Effect of CPP-ACP paste on mechanical properties of bovine enamel as determined by an ultrasonic device. K. Yamaguchi, M. Miyazaki, T. Takamizawa, H. Inage, B.K. Moore. *Journal of Dentistry* (2006) 34, 230-236 *
105. Ultrasonic determination of the effect of casein phosphopeptide-amorphous calcium phosphate paste on the demineralization of bovine dentin. K. Yamaguchi, M. Miyazaki, T. Takamizawa, H. Inage, H. Kurokawa. *Caries Res* 2007; 41:204-207 *
106. Resin bonding using an all-etch or self-etch adhesive to enamel after carbamide peroxide and/or CPP-ACP treatment. C.A. Moule, F. Angelis, G-H. Kim, S. Le, S. Malipatil, M.S. Foo, M.F. Burrow, D. Thomas. *Australian Dental Journal* 2007; 52(2):133-137 *
107. Effect of CPP-ACP paste on tooth mineralization: an FE-SEM study. M. Oshiro, K. Yamaguchi, T. Takamizawa, H. Inage, T. Watanabe, A. Irokawa, S. Ando, M. Miyazaki. *Journal of oral Science*, Vol.49, No.2, 115-120, 2007 *
108. Effect of a CPP-ACP agent on the demineralization and remineralization of dentine in vitro. C. Rahiotis, G. Vougiouklakis. *Journal of Dentistry* 35 (2007) 695-698
109. Remineralization of enamel lesion by a novel cream with both CPP-ACP and fluoride. S. Kariya, Y. Sakaguchi, T. Sato, S. Kato, L. Chen Y. Iijima. Poster session 136 – 54th Annual ORCA Congress 2007 *
110. Considering biomodification and remineralization techniques as adjuncts to vital tooth-bleaching regimens. F.J. Milnar. *Compendium*, May 2007;28(5):234-240 *
111. Aesthetic management of severely fluorosed incisors in an adolescent female. H. Ng, D.J. Manton. *Australian Dental Journal* 2007;52(3):243-248 *
112. Minimally invasive treatment of white spot enamel lesions. S. Ardu, N.V. Astioni, N. Benbachir, I. Krejci. *Quintessenz International*, Volume 38, Number 8, September 2007, p.633-636 *
113. The Role of Tooth Mousse in preventing enamel wear. S. Rajnjitkar, J.A. Kaidonis, G.C. Townsend, L.C. Richards. Poster 0375 - session 39- 42nd annual meeting of IADR-Continental European and Israeli Divisions, Sept 26th-29th 2007
114. Change in surface hardness of enamel by a cola drink and a CPP-ACP paste. Tantbiroj D, Huang A, Ericson MD, Poolthong S. *Journal of Dentistry* 36 (2008) 74-79
115. Effect of Acidulated Phosphate Fluoride and Casein Phosphopeptide–Amorphous Calcium Phosphate Application on Shear Bond Strength of Orthodontic Brackets. D. Keçik, S. Burçak Cehrelib, C. Sar, B. Unver. *Angle Orthodontist*, Vol 78, N°1, 2008, p129-133
116. Enamel Subsurface Lesion Remineralisation with Casein Phosphopeptide Stabilised Solutions of Calcium, Phosphate and Fluoride. N.J. Cochrane S. Saranathan F. Cai K.J. Cross E.C. Reynolds. *Caries Res* 2008;42:88-97
117. Combined CPP-ACP and photoactivated disinfection (PAD) therapy in arresting root surface caries: a case report. J. Vlacic, I. A. Meyers and L. J. Walsh. *Br Dent J* 203:457-459 2007
118. Early Childhood Caries- A Review_S Misra, Jinous F Tahmassebi & Micheal Bosnam. *Dental Update* Nov 2007;34:556-564
119. Fluoride and casein phosphopeptide-amorphous calcium phosphate. E.C. Reynolds, F. Cai, N.J. Cochrane, P. Shen, G.D. Walker, M.V. Morgan, and C. Reynolds. *J Dent Res* 87(4):344-348, 2008
120. An in vitro assessment of the role of Tooth Mousse in preventing wine erosion. C Piekarz, S Ranjitkar, D Hunt, J McIntyre. *Australian Dental Journal* 2008; 53: 22-25

121. The effect of casein phosphopeptide-amorphous calcium phosphate on remineralization of artificial caries-like lesions: an in vitro study. VLN Kumar,* A Itthagarun, NM King. Australian Dental Journal 2008; 53: 34-40
122. An Introduction to Minimal Intervention Dentistry (MI). S Mickenautsch. DENTAL NEWS, VOLUME XIV, NUMBER IV, 2007
123. A new paradigm for operative dentistry. GJ Mount. Australian Dental Journal 2007;52:(4):264-270
124. Application of the System for Total Environmental Management(STEM) to demineralization, dental erosion and tooth wear. Laurence J.Walsh, Australasian Dental Practice Jan-Feb 2008
125. Pronamel and tooth mousse: An initial assessment of erosion prevention in vitro. Jeremy Rees a, Theresa Loyn, Barbara Chadwick. journal of dentistry 35 (2007) 355-357
126. Characterization of oral films formed in the presence of a CPP-ACP agent: An in situ study. Christos Rahiotis, George Vougiouklakis, George Eliades. journal of dentistry 36 (2008) 272-280
127. New Strategies in dental caries prevention: experimental study on casein phosphopetide. G.F.Ferrazzano, T.Cantile, A.Ingenito, L.Chianese, M.Quarto. European Journal of Paed Dentistry 4/2007
128. Development of GIC incorporating Caesin Phosphopetide amorphous phosphate (CPP_ACP) complex. ADRF Research Abstracts. H Al-Zraikat, J Palamara, M Burrow, H Messer.
129. Structural Characterization of Beta-Caenin(1-25)-ACFP Complex. KJ Cross, NL Huq, DP Stanton, H He, EC Reynolds. Aust Dent J ADRF Special Research Supplement 2007;52:4
130. Structural Characterization of anticariogenic casein Phosphopeptide alphas2 caenin(46-70 complexed with amorphous calcium phosphate. KJ Cross, NL Huq, DP Stanton, H He, EC Reynolds, K Lau. Aust Dent J ADRF Special Research Supplement 2007;52:4

351. Microshear bond strength of adhesives to enamel remineralized using casein phosphopeptide agents. E.H. Mobarak, N. Ali & L.E. Daifalla. *Operative Dentistry*, 2015, 40-5, pp. E180-E188.
352. CPP-ACP and CPP-ACFP versus fluoride varnish in remineralisation of early caries lesions. A prospective study. C. Llana, A. M. Leyda & L. Forner. *European Journal of Paediatric Dentistry*, 2015 16(3), pp. 181-186.
353. Efficacy of Calcium- and Fluoride-Containing Materials for the Remineralization of Primary Teeth with Early Enamel Lesion. M. Memarpour, E. Soltanimehr & N. Sattarahmady. *Wiley Periodicals*, September 2015, 78(9), pp. 801-806
354. The Effect of Casein Phosphopeptide-Amorphous Calcium Phosphate on Molar-Incisor Hypomineralisation: A Pilot Study. M. Bakkal , Abbasoglu Z, Kargul B. *Oral Health Prev Dent*. 2017;15(2):163-167. doi: 10.3290/j.ohpd.a37928
355. Efficacy of fluorides and CPP-ACP vs fluorides monotherapy on early caries lesions: A systematic review and meta-analysis. Siying Tao, Yan Zhu, He Yuan, Sibe Tao, Yiming Cheng, Jiyao Li, Libang He. *PLOS ONE* | <https://doi.org/10.1371/journal.pone.0196660> April 30, 2018
356. The use of casein in sport mouthguards: microbiological and ecological variations in oral cavity. D. Tripodi, D. Martinelli, C. Ciaravino, M. Tieri, S. D'ercole. *Journal of biological regulators & homeostatic agents*, Vol.32n°4, 1045-1049 (2018)
357. Effect of GC Tooth Mousse and MI Paste Plus on Dental Plaque Acidity. H. Haleh, A. Hadi, F. Foad. *IADR 2013 Iranian Division Meeting* (Tehran, Iran)
358. The in vitro remineralizing effect of CPP-ACP and CPP-ACPF after 6 and 12 weeks on initial caries lesion. Thierens LAM, Moerman S, Elst CV, Vercruysse C, Maes P, Temmerman L, Roo NMC, Verbeeck RMH, Pauw GAM. *J Appl Oral Sci*. 2019 May 20;27:e20180589. doi: 10.1590/1678-7757-2018-0589
359. Comparison of effectiveness of GC Tooth Mousse with fluoride varnish for treatment of dentinal hypersensitivity. B. Irum, A. Maxood, J. Ai Khan, R. Haroon, G. Panrah Arbab, K. Rehman. *JKCD* Sept 2019, Vol.9, No.3. doi: <https://doi.org/10.33279/2307-3934.2019.9121>
360. Prevention and caries risk management in teenage and orthodontic patients. LJ Walsh, DL Healey. *Australian Dental Journal* 2019; 64:(1 Suppl): S37-S45
361. Evaluation of the efficacy of casein phosphopeptide-amorphous calcium phosphate on remineralization of white spot lesions in vitro and clinical research: a systematic review and meta-analysis. X. Ma, X. Lin, T. Zhong, F. Xie. *BMC Oral Health* (2019) 19:295. <https://doi.org/10.1186/s12903-019-0977-0>
362. Effect of Biomineralization on Resin/Demineralized Dentin Bonding Longevity: 18-Month Follow-Up. K. Moreira, R. Puppi-Rontani. *J Dent Res J Dent Res Vol 99* (Spec IssA): 1528, <https://iadr2020.zerista.com/event/member/678693>, 2020
363. From Erosion to Remineralization: The Possible Role of Two Topic Home Devices Used as Combined Treatment. L. Fanfoni, F. Costantinides, F. Berton, G.

- Marchesi, L. Polo, R. Di Lenarda, V. Nicolin. Appl. Sci. 2020, 10, 4093; doi:10.3390/app10124093
364. Tooth Mousse Containing Casein Phosphopeptide-Amorphous Calcium Phosphate Prevents Biofilm Formation of Streptococcus Mutans. Sionov, Ronit Vogt, Danae Tsavdaridou, Muna Aqawi, Batya Zaks, Doron Steinberg, and Miriam Shalish. BMC Oral Health 21 (1): 136. <https://doi.org/10.1186/s12903-021-01502-6>.
365. Case report of a novel interim approach to prevent early posteruptive enamel breakdown of molar-incisor hypomineralization-affected molars. S. Bagattoni, I. Gozzi, L. Lardani, G. Piana, A. Mazzoni, L. Breschi, C. Mazzitelli. JADA 2021:152(7):560-566
<https://doi.org/10.1016/j.adaj.2021.04.015>
366. The effect of different remineralization agents in the treatment of caries dentin in primary teeth. E. Yılmazkasapoğlu Türkay, A. Karakaş Aydınoglu, A. Binnaz Hazar Yoruç, B. Kargül. Abstract PP-12, 27th International Congress of Turkish Society of Paediatric Dentistry, 7-10 October 2021
367. Effects of a Topical Crème Containing CPP-ACP with Fluoride (Tooth Mousse Plus™) on Dental Plaque during Orthodontic Treatment. Tabatabaee, Sepehr, Shaneen J. Leishman, and Laurence J. Walsh. International Journal of Research and Reports in Dentistry 4 (4): 179-91, 2021.
<https://doi.org/10.2/JQUERY.MIN.JS>
368. Management of Post Orthodontic White Spot Lesions Using Resin Infiltration and CPP-ACP Materials- A Clinical Study. Simon, L. S., Dash, J. K., U, D., Philip, S., & Sarangi, S. The Journal of Clinical Pediatric Dentistry, 46(1), 70-74, 2022.
<https://doi.org/10.17796/1053-4625-46.1.12>
369. Analysis of dentin remineralization and obstruction of Dentinal Tubules: An in vitro study. E. Yılmazkasapoglu Turkay, A. Karakas Aydinoglu, A. Binnaz Hazar Yoruç, B. Kargul. Abstract & Poster, Conseuro April 2022, Antalya, Turkey
